

Topline Trends with Graphs

Did you know that you can graph your topline trends?

Log in at www.RRConline.org.

Hover over **Data & Software**, then click on **Diary Market Topline**.

In the new window, click the **Graphs** button above the **By Market** section.

Select **XXXX-XX** from the list (you may need to move the first window to see the list).

Follow the on screen instructions to graph up to five surveys of data!

Once you've generated this page, you can click on any of the individual graphs for a one-sheet for that estimate.

Here is a sample station with the five most recent surveys graphed:
